

## TABLE OF CONTENTS

List of Tables, Boxes and Figures .....	viii
Acknowledgements .....	xi
CHAPTER ONE – INTRODUCTION.....	1
1. Sociological Theories of Labour Market Structures: A Critical Review .....	5
1.1. Black-box approaches: youth integration and functional-familialistic perspectives .....	5
1.1.1. Youth-integration approaches.....	6
1.1.2. Functionalist-familialistic accounts .....	7
1.1.3. The importance of families.....	9
1.2. Segmentation theories: dual labour market and neo-Marxists models .....	12
1.2.1. Dual labour markets .....	13
1.2.2. Monopoly capitalism, control and segmentation.....	14
1.3. Job insecurity and class: from black-box accounts to generative explanations .....	18
1.3.1. Goldthorpe’s model and the institutionally-insensitive character of class theories.....	20
1.4. The flexible firm.....	25
1.5. Institutions matter.....	27
1.6. The dynamics of type-of-contract segmentation .....	29
2. Sociological Evidence on the ‘Consciousness’ Effects of Type-of-Contract Segmentation in Spain: A Critical Review .....	31
2.1. Type-of-contract segmentation and the trade unions.....	31
2.1.1. The evidence .....	33
2.2. Type-of-contract segmentation and electoral behaviour.....	34
3. Structure of the Thesis .....	36

## PART ONE

CHAPTER TWO – THE EFFECTS OF FIXED-TERM EMPLOYMENT ON LABOUR MARKET OPPORTUNITIES: AN ANALYTICAL FRAMEWORK .....	41
1. Segmentation and Labour Market Opportunities: The Output Variable.....	44

2. The Model: LMOs and Employment Rents in Regulated Markets.....	46
2.1. Composite rents due to asset specificity.....	49
2.1.1. Employers' strategies to maximise their share of composite rents .....	51
2.1.2. Governance structures, incentives schemes and composite rents .....	52
2.1.3. Efficiency wages .....	53
2.1.4. Implications.....	54
2.2. Employment rents on collective action and the segmenting role of bargaining Systems.....	56
2.2.1. The insider-outsider model .....	57
2.2.1.1. Implications .....	59
2.2.2. Union rents and the collective bargaining system.....	60
2.2.2.1. The hump-shaped hypothesis .....	60
2.2.3. The Spanish bargaining system and insider effects.....	62
2.2.3.1. Structure, scope and depth of collective bargaining in Spain .....	63
2.2.3.2. Degree of coordination and synchronisation.....	66
2.2.3.3. The competitive character of unions .....	67
2.2.3.4. Waterfall bargaining .....	67
2.2.3.5. Implications.....	68
2.3. Regulatory rents: rents on dismissal costs .....	69
2.3.1. Rents on dismissal costs in Spain.....	69
2.3.2. Implications.....	73
3. The Segmenting Impact of the Introduction of Fixed-Term Contracts in Spain .....	74
3.1. Characteristics of flexibilisation via fixed-term contracts in Spain.....	74
3.2. Hypotheses regarding the segmenting impact of fixed-term employment in Spain.....	77
3.2.1. The incentive effect.....	78
3.2.2. The buffer effect.....	79
3.2.3. Reinforcing mechanisms.....	80
4. Summary .....	81
CHAPTER THREE – THE EFFECTS OF FIXED-TERM EMPLOYMENT ON EMPLOYMENT CHANCES .....	83
1. The Main Characteristics of the Spanish Labour Market.....	85
1.1. The first employment crisis: 1977-1985.....	85
1.2. Labour reform and employment creation: 1984-1991 .....	89

1.3. Labour reform and the second employment crisis: 1991-1994.....	90
2. General Employment Effects of the 1984 Labour Market Reform .....	91
2.1. The labour force survey data .....	91
2.2. Hypotheses .....	93
2.3. Entries into employment.....	94
2.4. Exits from employment into unemployment: the buffer effect.....	96
2.5. Labour flexibility and the increase in worker turnover .....	98
2.5.1. Indirect indicators of unstable trajectories using the LFS.....	101
2.6. Transitions from fixed-term into permanent contracts .....	104
2.6.1. Interpretations of the observed decline in conversion rates and of its non-monotonic character .....	108
2.6.2. The trap .....	109
3. Class, Type of Contract and Job Insecurity: the Interplay of Asset-Specificity and Regulatory Factors in the Distribution of Employment Chances.....	110
3.1. The class variable .....	112
3.2. Structure and evolution over time of fixed-term employment: the class pattern of fixed term employment.....	114
3.2.1. The class structure of fixed-term work.....	114
3.2.2. Levels of fixed-term employment have increased significantly in all classes.....	115
3.3. The insecurity of fixed-term work and the buffer effect by class .....	117
3.4. The structure of conversion rates from fixed-term into permanent employment .....	121
3.4.1. Human capital, class and transition rates .....	121
3.4.2. Human capital, class and the decline of conversion rates.....	123
3.5. Class, type of contract and the distribution of unemployment risks in the Spanish labour market: a challenge for employer-centred class models.....	124
4. Summary .....	128
CHAPTER FOUR – THE EFFECTS OF FIXED-TERM EMPLOYMENT ON WAGES .....	131
1. Hypotheses, Data and Methodology .....	133
1.1. Hypothesis one: wage discrimination against fixed-term workers .....	133

1.2. Hypothesis two: insiders' wage mark-up as a result of the buffer effect.....	134
1.3. Data and methodology.....	135
2. Fixed-term Employment and Wage Discrimination.....	136
2.1. Bivariate analysis to test wage discrimination by type of contract .....	137
2.2. Multivariate analysis to test wage discrimination by type of contract.....	143
3. Testing an Insider Outsider Model of Wage Determination in Spain.....	153
3.1. The model.....	153
3.2. Secondary empirical evidence on insider effects in the Spanish wage-setting process .....	154
3.2.1. Bentolila and Dolado's model.....	155
3.2.1.1. Two qualifications .....	156
3.2.2. The existing evidence on the insiders' mark-up in Spain .....	157
3.3. Original multivariate analysis of the buffer effect with individual data.....	163
3.4. The wage drift and the sensitivity of wages to unemployment: dynamics .....	168
4. Summary .....	169

## PART TWO

CHAPTER FIVE – CONSCIOUSNESS EFFECTS OF TYPE-OF-CONTRACT SEGMENTATION: AN ANALYTICAL FRAMEWORK.....	173
1. On the Appropriate Level of Analysis and the Scope of the Dependent Variable.....	176
1.1. Operationalising consciousness: in favour of disaggregation of the concept.....	178
2. The Analytical Model .....	181
2.1. Potential labour market interests .....	181
2.2. Interest are only potential and actors are also ideologically motivated.....	184
2.2.1. Ideological maps .....	185
2.3. Theoretical implications of the approach .....	187
3. Methodological Notes .....	188
3.1. On the focus groups.....	189
4. Summary .....	191

CHAPTER SIX – LABOUR MARKET SEGMENTATION AND TRADE UNION INVOLVEMENT IN SPAIN .....	193
1. Type-of-Contract Segmentation and Workers’ Involvement with the Trade Unions in Contemporary Spain: Hypotheses, Data and Methodology .....	197
1.1. Defining trade union involvement .....	198
1.2. Hypotheses .....	200
1.3. Data and Methodology .....	202
2. Testing Sub-Hypothesis 1: Labour Market Precarity Diminishes Pro-Union Activity (irrespectively of subjective attitudes towards unions) .....	203
2.1. Methodological caveats .....	204
2.2. Fixed-term employment and trade union membership .....	205
2.3. Fixed-term employment and union vote .....	208
2.4. Fixed-term employment and participation in strikes and stoppages in the workplace .....	211
2.5. Class-type interactions and predicted probabilities in the models .....	214
3. Testing Sub-Hypothesis 2: A Precarious Working Situation Diminishes Subjective Involvement with the Trade Unions. Qualitative Evidence .....	216
3.1. Methodological approach .....	217
3.2. The heart of disaffection: a summary of qualitative evidence obtained from focus groups .....	218
3.2.1. Outsiders’ views on the unions in their own words .....	219
4. Testing Sub-Hypothesis 2: A Precarious Working Situation Diminishes Subjective Involvement with the Trade Unions. Statistical Evidence from the CSCCCB and the CSRSTUA .....	229
4.1. Labour market situation and identification with the trade unions using CSCCCB data .....	229
4.1.1. Interaction effects: testing the dissonance hypo- thesis using CSCCCB data .....	232
4.1.1.1. Interpreting the interaction effect tested by model B .....	233
4.2. Exploring the evaluation that insiders and outsiders make of unions’ role in the defence of outsiders using CSRSTUA data .....	238
4.3. Testing dissonance mechanisms in the CSRSTUA .....	246
5. Summary .....	247

CHAPTER SEVEN – THE POLITICAL CONSEQUENCES OF  
TYPE-OF-CONTRACT SEGMENTATION IN SPAIN:  
POLITICAL DISCONTENT AND ITS ELECTORAL IMPACT  
IN THE 1996 GENERAL ELECTIONS.....251

1. The Political Consequences of Type-of-Contract Segmentation: Hypotheses and Methodology.....	253
1.1. Radicalisation, disaffection and frustration as forms of political discontent .....	256
1.2. The punishment vote hypothesis .....	257
1.2.1. Intra-bloc and inter-bloc punishment vote .....	258
1.2.2. What triggers punishment voting? .....	259
1.3. On the methodology .....	260
2. Effects of Type-of-Contract Segmentation on Political Attitudes. Testing the Political Discontent Hypotheses .....	261
2.1. Type-of-contract segmentation and critical attitudes towards the economic system in the CSCCCB survey .....	261
2.2. Type-of-contract segmentation and attitudes regarding socio-political change in the CSRSPC .....	269
2.3. Type-of-contract segmentation and political disaffection in the CSRSPC .....	273
2.3.1. Subjective involvement in politics .....	275
2.3.2. External Efficacy.....	279
2.4. A typology of forms of political discontent.....	286
3. Political Discontent and Punishment Voting in the 1996 General Elections .....	288
3.1. Testing intra-bloc punishment: did labour precarity favour the chances that 1993-Socialist voters decided to vote for IU in 1996?.....	288
3.1.1. Political discontent as an explanatory mechanism .....	291
3.1.2. Intra-bloc punishment and economic deprivation .....	292
3.2. Testing inter-bloc punishment: did labour precarity favour the chances that potential Socialist voters decided to vote for the conservative Popular Party (PP) in 1996?.....	295
3.2.1. Political frustration as an explanatory mechanism.....	302
3.2.2. Inter-bloc punishment and economic deprivation .....	306
4. Summary .....	308

CHAPTER EIGHT – THE STRUCTURING IMPACT OF TWO-TIER DEREGULATION IN SPAIN: CONCLUSIONS.....311

1. The impact of Deregulation on Labour Market Structures.....	312
2. ‘Consciousness’ Effects of Type-of-Contract Segmentation .....	319

2.1 Type-of-contract segmentation and trade union involvement.....	321
2.2. The electoral consequences of Type-of-contract segmentation .....	324
BIBLIOGRAPHY .....	327
APPENDIX A- Statistical Appendix to Chapter Three.....	365
APPENDIX B- Technical Description of the Surveys used in the Dissertation .....	389

## LIST OF TABLES, BOXES AND FIGURES

Table 2.1. ‘Restrictiveness’ of Dismissal-protection Regulations: Ranking of Countries According to Different Comparative Studies .....	70
Table 3.1. Summary Table: Evolution of Different Labour Market Indicators in the LFS.....	107
Table 3.2. Summary Table: Evolution of Different Labour Market Indicators in the LFS for selected “Service” and “Labour” Occupational Classes (LFSCS1).....	119
Table 3.3. Summary Table: Unemployment, Job Tenure and Subjective Insecurity Figures by Class and Type of Contract for the Year 1997 .....	126
Table 4.1. Yearly Earnings (in Thousands of Pesetas); Blue Collar-White Collar Earning Ratios and Fixed-Term-Permanent Earning Ratios in Spain. 1988 .....	140
Table 4.2. Gender and Type of Contract Wage Differentials by Occupational Categories. 1988.....	141
Table 4.3. Wage Differentials by Gender and Type Of Contract. 1988.....	142
Table 4.4. Robust Regressions on Log Gross Earnings per Hour usually Worked according to the LFPSE (1990).....	147
Table 4.5. Robust Regressions on Log Net Earnings per Hour usually Worked according to the CSCCCB (1991).....	151
Table 4.6. Correlation Between Wage Rate Increases and Proportion of Fixed-Term Workers in the Previous Year for Various Years.....	161
Table 4.7. Pooled Regressions on Wage Rate Increases in Collective Agreements, 1988-1991 .....	162
Table 4.8. The Buffer Effect on Wages: Robust Regressions on Permanent Workers’ Log Net Earnings per Hour usually Worked according to the CSCCCB (1991).....	165
Table 5.1. The Four Realms of the Dependent Variable in the Research on the ‘Consciousness’ Effects of Two-Tier Segmentation .....	180
Table 6.1. Logistic Regressions on Different forms of Collective Action: Employed Population .....	210
Table 6.2. Average Predicted Probabilities of Affiliation, Vote, and Participation in Strikes and Stoppages by Class and Type of Contract. Values for Ideologically Moderate Respondents Employed in Small Private Sector Firms as Predicted by Models on Table 6.1 .....	215

Table 6.3.	Robust Regressions on Index of Identification with the Trade Unions .....	235
Table 6.4.	Factor Analysis on Evaluative Questions regarding Unions' Representational Performance.....	240
Table 6.5.	Robust Regressions on the Evaluation of the Extent to Which Unions Defend Fixed-Term and Unemployed Workers: Employed Population .....	242
Table 7.1.	Linear Regressions on Normative Evaluations of the Economic System.....	265
Table 7.2.	Ordinal Logit Regressions on Opinions regarding Socio-Political Change.....	271
Table 7.3.	OLS Regressions on Political Involvement .....	278
Table 7.4.	Heteroscedasticity Robust Regression on Political Disaffection (External Inefficacy) .....	280
Table 7.5.	Ideal Types of Attitudinal Response and Proportion of Outsiders in each of the Cells According to the CSRSPC (1995) .....	287
Table 7.6.	Logistic Regressions on Vote Intention for the United Left vs. Vote Intention for the Socialist Party for Respondents who Voted Socialist in 1993.....	289
Table 7.7.	Average Predicted Probabilities that Leftwing Respondents who Voted Socialist in 1993 Vote for the United Left in 1996 (instead of Voting for the PSOE) by Class and Labour Market Position as Predicted by Model A of Table 7.6.....	290
Table 7.8.	Logistic Regressions on Voting Intention for United Left vs. Voting Intention for the Socialist Party for Respondents who Voted Socialist in 1993: Testing the Economic Deprivation-Mechanism Hypothesis.....	294
Table 7.9.	Logistic Regressions on Vote Intention for the Popular Party vs. Vote Intention for the Socialist Party (PSOE) for Respondents who Voted Socialist in 1993 .....	296
Table 7.10.	Average Predicted Probabilities that Leftwing Respondents who Voted Socialist in 1993 Vote for the PP in 1996 instead of Voting for the PSOE by Class and Labour Market Position as Predicted by Model B of Table 7.9.....	297
Table 7.11.	Logistic Regressions on Vote Intention for the Conservative Party (PP) vs. Vote Intention for the Socialist Party (PSOE).....	299

Table 7.12.	Average Predicted Probabilities that Male Leftwing Respondents Vote for the PP instead of Voting for the PSOE by Class and Labour Market Position as Predicted by Model B of Table 7.11 .....	301
Table 7.13.	Logistic Regressions on Vote Intention for the Conservative Party (PP) vs. Vote Intention for the Socialist Party (PSOE): Testing Political frustration as an explanatory mechanism .....	305
Table 7.14.	Logistic Regressions on Voting Intention for PP vs. Voting Intention for PSOE: Testing the Economic Deprivation-Mechanism Hypothesis.....	307
Box 6.1.	Union Membership and the Discipline Mechanism.....	207
Box 6.2.	Strikes and Stoppages and the Discipline Mechanism.....	213
Box 6.3.	Insiders' Views on the Discipline Mechanism.....	214
Box 6.4.	Defencelessness (I) .....	220
Box 6.5.	Defencelessness (II).....	221
Box 6.6.	Unions Defend their own Interests.....	222
Box 6.7.	Unions Defend Insiders' Interests.....	223
Box 6.8.	Unions Ultimately Benefit Employers.....	225
Box 6.9.	Betrayed Workers (I) .....	226
Box 6.10.	Betrayed Workers (II).....	227
Box 6.11.	Outsiders' conclusion.....	228
Box 7.1.	Labour Market Precarity and Normative Evaluations of the Economic System (I).....	266
Box 7.2.	Labour Market Precarity and Normative Evaluations of the Economic System (II) .....	267
Box 7.3.	Labour Market Precarity and Radicalism .....	268
Box 7.4.	Political Disaffection (I) .....	281
Box 7.5.	Political Disaffection (II).....	282
Box 7.6.	Political Disaffection (III).....	283
Box 7.7.	Unemployment and Political Aggressiveness .....	285
Box 7.8.	Unemployment and Economic Voting.....	304
Figure 6.1.	Three Different Hypotheses regarding the Relationship between Evaluation of Unions as Insiders' Defenders and Evaluation of Unions as Outsiders' Defenders as Tested by Model A and Model B of Table 6.5 .....	243
